Scope of Certification
ISO 26262-2:2018 Management of functional safety
ISO 26262-4:2018 (in extracts) Product development at the system level
ISO 26262-7:2018 (in extracts) Production and operation
ISO 26262-8:2018 (in extracts) Supporting processes

The Certified Company has successfully demonstrated during an audit process that a Functional Safety Management System has been defined.

Maturity Level: Defined – Practiced

Purpose of the audit is to obtain evidence of compliance with the organizational requirements related to the following aspects, **Management of Functional Safety, Documentation and Safety Lifecycle Phases** according to the Scope of Certification up to and including **Automotive Safety Integrity Level ASIL B**.

This covers the **technical safety requirements at the System Level and Production of automotive lamp products according to ISO 26262**. System design according to ISO 26262-4 Clause 6, System and item integration and testing according to ISO 26262-4 Clause 7, Safety validation according to ISO 26262-4 Clause 8, and the Lifecycle phases after production are **excluded**.

As part of the audit process organizational and informational exchange / supply related to other respective Safety Lifecycle Phases between the Certified Company and its customer is considered.

This FSM Certification only refers to the listed company location and their involved departments, which comply with the organizational FSM requirements for the listed Scope of Certification. It does not replace any kind of product specific Confirmation Measures including product specific audits or assessments.

Validity This certificate is valid until 2024-08-12
